Experience

Mechanical Design Engineer II

Mar 2023 – Present

Hydra Medical Systems Lda.

Led the dose-counter redesign on an inhaler that runs 400,000 units a year and cut its part count from nine to five, which took two weeks off the tooling.

Built the drop and cycle test rig used for design verification of every new part that came in from the moulders and the suppliers.

Wrote the test protocols and qualified the moulding suppliers behind them across two sites.

Prototype Tester

Sep 2021 – Feb 2023

Polytechnic Prototyping Lab
Porto, Portugal

Ran a seven-machine prototyping shop for the engineering faculty and the student teams that built their cars there.

Four FDM printers, a resin printer, a benchtop mill and a laser cutter, all booked weeks ahead.

Trained eleven students on the machines.

Kept the shop under budget for both years while the number of jobs went up by half over the same time.

Wrote the safety rules for each machine.

Earlier work

Clean-room Technician

Jun 2018 – Dec 2020

Medisure Devices Ltd
Maia, Portugal

Ran ISO 7 clean-room assembly for three catheter products across two shifts a day, five days a week, with a crew of nine.

Cut scrap on the bonding line.

Wrote the work instructions for the new fixture.

Trained four operators on it and signed off their first assemblies in the first month of the new line.

Graduate Manufacturing Engineer

Sep 2017 – May 2018

Northgate Dosing Systems Ltd.

Supported the line moving to a new moulding press and kept the yield above target through the whole of the change.

Measured every part for the first article report in the lab on site and signed it off with the customer.

Drew the fixtures for the new line.

Skills

SolidWorks (CSWP)
Creo, Fusion 360
CNC milling
Laser cutting
ISO 13485

Education

M.Eng. Mechanical Engineering 2021
Universidade do Porto

B.Sc. Engineering 2019
Universidade do Porto
