Dana Okonkwo

Mechanical and design engineer

Experience

Mar 2023 — Present

Hydra Medical · Design Engineer

Led the dose-counter redesign on an inhaler running 400,000 units a year.
Cut the part count from nine to five and took two weeks out of the tooling schedule.
Built the drop and cycle test rig used for design verification.
Wrote the test protocols and qualified the moulding suppliers behind them.

Sep 2021 — Feb 2023

Polytechnic Prototyping Lab · Prototyping Technician

Ran a seven-machine prototyping shop.
Four FDM printers, a resin printer, a benchtop mill and a laser cutter.
Trained eleven students on the machines in two terms.
Kept the shop under budget for both years.

Jun 2018 — Dec 2020

Medisure Contract Manufacturing · Clean-room Technician

Ran ISO 7 clean-room assembly for three catheter products.
About 9,000 units a week across two shifts.
Cut scrap on the balloon-bonding line from 6% to 2.5% by redesigning the bonding fixture.
Wrote the work instructions for the new fixture.
Trained four operators on it.
